

## Procurement Collections

April 2022

From personal interest to educational research, BadgerLink is Wisconsin's Online Library, providing Wisconsin residents access to licensed trustworthy resources. The resources are designed to provide a foundational collection serving all Wisconsin residents, augmenting those available through K-12 schools, public libraries, public and private universities and technical colleges, medical and health-care facilities and practitioners, and state agencies.

BadgerLink is a service provided by the Department of Public Instruction and is designed to fulfill a portion of the statutory requirements of Wis Stat. 43.05 (11).

Because BadgerLink resources are purchased and licensed by a Wisconsin state agency, all Department of Administration procurement procedures and requirements apply to the process. The current Department of Administration Procurement Manual states that “the competitive bidding process is the preferred method for selecting suppliers and will be used in every case unless it is determined, and justified, that competitive bidding is not practical or in the state’s best interest.”

The Department of Public Instruction (DPI) is not able to change or add resources or content providers in the middle of a contract or without an awarded Request for Bid (RFB) or Request for Proposal (RFP). DPI is also unable to purchase a specific resource by name as procurement guidelines require all potential content providers be given equal opportunity to respond to an RFB or RFP.

Based on the general selection principles as outlined in the [BadgerLink Collection Development Policy](#), procurement of resources is currently grouped into 13 broad “collections” or subject areas. Each collection is unique and awarded a contract, and the number of resources procured is impacted by the current level of BadgerLink funding in the Wisconsin biennial budget.

A broad definition of each collection is provided below, along with the vendor and products awarded contracts in the most recent 2018 RFB. The collection areas, their definitions, and requirements may evolve along with the needs of Wisconsin residents.
