

Language Translation Tools in BadgerLink Resources

Many BadgerLink resources have a language translation tool, making it easy to change the resource's interface or an article's language with a click or two.

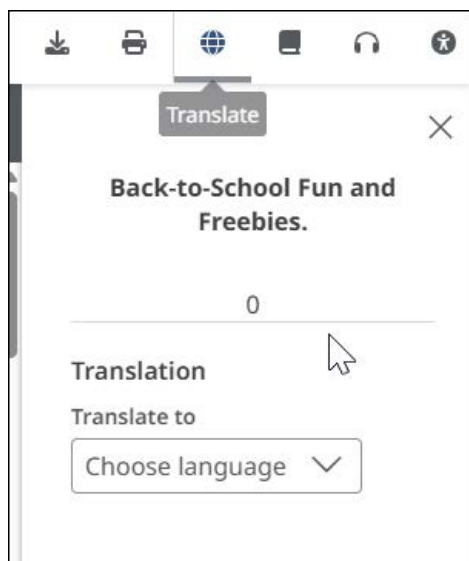

Select the Translation tool icon or dropdown menu in each of these BadgerLink resources.

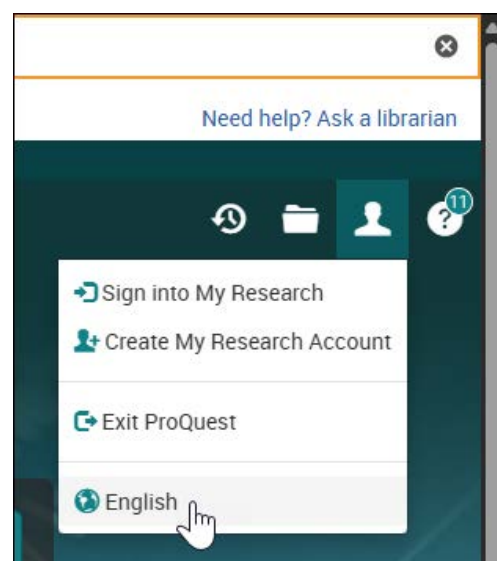

Any encyclopedia article in Britannica School has the Navigator section in upper left to select Translate tool.

Any online full text article in EBSCO resources has the circular grid icon to translate from a dropdown menu of language options.

At the top of the resource's home page, select the profile icon and click the globe to access a list of language options.

TeachingBooks®

At the top of the TeachingBooks' or TeachingBooks for Libraries' home page, select the language from a dropdown of many language options.
